To Whom It May Concern,

This letter serves as a recommendation for the Bali Peduli Foundation as part of their funding application to the Elizabeth Taylor AIDS Foundation.

The Bali Peduli Foundation has gained national and international recognition for their contribution to the prevention of HIV and care, support and treatment for those living with HIV in Bali, Indonesia. Bali Peduli concentrates on providing comprehensive services for marginalized and key affected populations, filling a unique gap in service provision for these at-risk and underserved communities.

Bali Peduli is well respected for its tireless efforts in providing free and comprehensive services to the local population, and for its close collaboration with the local government and implicated stakeholders.

Bali Peduli works in heavily populated urban centres, such as Kuta, but also works with the local community in the more regional area of Ubud, running established information dissemination programs designed for local youth, educating them on safe sexual behaviours, and healthy relationship models.

The services they provide fill a vital gap in current HIV programming in the province and we wholeheartedly support their application as a much valued and collaborative partner.

Please do not hesitate to contact us if you require further information on the work of Bali Peduli.

Please seriously consider their application in seeking funds to ensure program susbtainability.

Thanking you in advance,

Warm regards,

Prof. D,N.Wirawan
