OUR MISSION

We are a dedicated foundation committed to enhancing the well-being of individuals impacted by HIV. We have made significant progress in our mission to prevent new infections, we provide support to those living with HIV, and promote sexual health literacy and HIV prevention awareness. Yayasan Bali Peduli (YBP) was established in 2011 in response to the growing concerns about the spread of HIV/AIDS among the residents of Bali under the guidance of Dr. Steve Wignall MD, an HIV physician and clinical researcher. In 2013, Bali Peduli received its final legal status as a registered non-profit organization in Indonesia.

Throughout the years, as the reports show, we have made a profound impact on communities, and this has been made possible through the generous contributions from private donors and grants from esteemed organizations. We extend our gratitude to donors and organizations such as Rotary Club Jakarta Sentral, Rotary Club Jakarta Metropolitan, Jawa Power, PT Sampharindo Retroviral Indonesia, Alere Corporation, and MedQuest for their support. Additionally, the Ministry of Health of Indonesia plays a vital role in our efforts by supplying antiretroviral drugs, test kits, and reagents for HIV, STIs, Hepatitis B, and Hepatitis C testing.

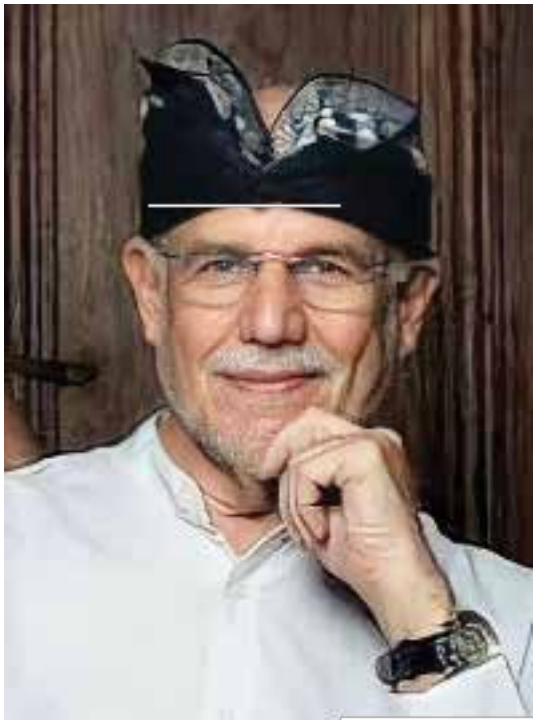
MESSAGE FROM THE FOUNDER

Dear friends,

I hope that you will all be able to take a few moments to read through this Annual Report and see all the amazing work that the Bali Peduli team has done during 2022. More people are coming for testing, care and treatment at the clinic given its friendly attitude, affordability, and accessibility. That friendly model is one that Dr Hendry and team have shared during visits and in national and international fora.

As Dr Hendry points out, however, comprehensive HIV care is much more than simply delivering anti-retroviral drugs. The BP team is active in prevention education for those at risk, training of medical and non-medical personnel, promotion of HIV testing, pre-exposure prophylaxis (PrEP), HIV self-testing and more. Dr Hendry has been a particular advocate for the human rights aspect of access to care, ensuring that stigma and discrimination do not become barriers to access for those at risk for or are living with HIV. With all this, research activities that focus on HIV risk reduction and detection of early HIV infection are also ongoing. The many accomplishments of the small but nimble Bali Peduli should make us all both thankful and proud!

Though this report focuses on 2022, I need to mention that the clinic has recently moved since the lease on Paul Latourell's house ran out and the owners declined to renew or extend. An Ubud angel who had helped us start the Ubud Clinic again came to the rescue advancing funds for rent, some renovations, and the move. The relocated clinic is in Imam Bonjol Square, Imam Bonjol Street, Pemecutan Klod, West Denpasar, Denpasar City and is closer to our client base, offers both more space and a more professional look. But as mentioned, work in the new clinic is not finished. We plan to offer a commercial pharmacy and lab services for the public that will generate income and support for operations and



cross subsidize some essential services like HIV, STI and viral load testing for Indonesian nationals. We need help completing the lab and pharmacy construction and additional funds for some operating costs. If you can help, please let Dr Hendry, Ibu Lily or I know. Anything will be deeply appreciated. We'd love for you to come and visit. Just give Dr Hendry or Ibu Lily a call or message and we'll make the arrangements.

I'm still in Cambodia and a supporter from afar but hope to see you during an upcoming visit.

Please join me in both congratulating and thanking Dr Hendry and the entire BP team for their amazing accomplishments, dedication, hard work, empathy and caring. They do an incredible job, and I am most proud and thankful for all that they have done.

Sincerely,
Steve Wignall MD

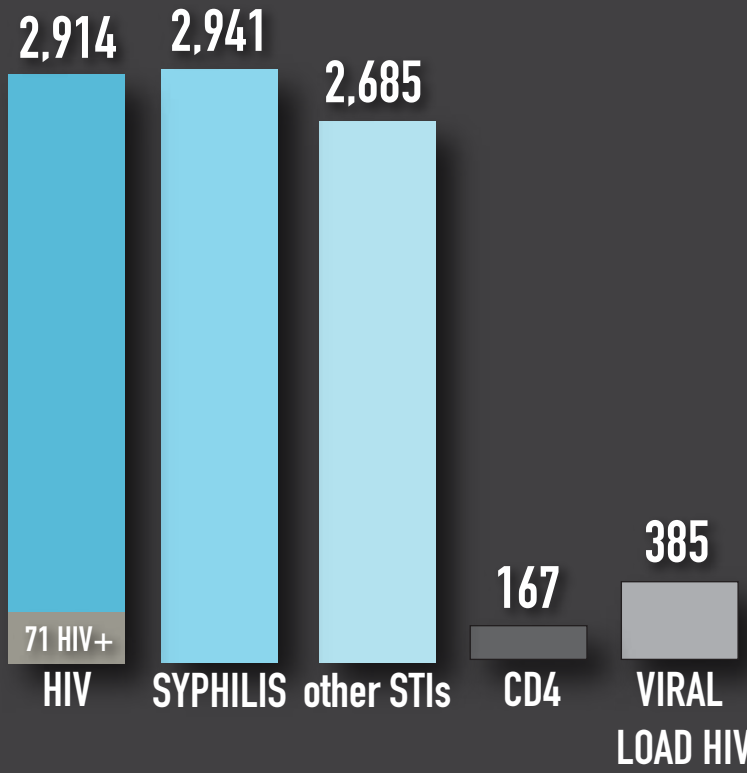
2022 YEAR IN REVIEW

11,399 PATIENT VISITS **&** **2,199** NEW PATIENTS ENROLLED

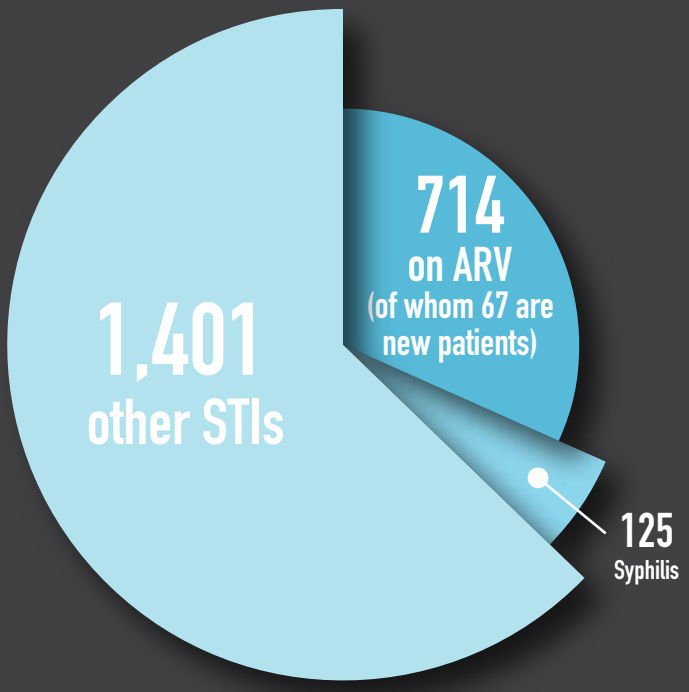
AT CLINICS IN UBUD & DENPASAR

8.8% INCREASE in patient visits from 2021

9,092 TOTAL TESTS



2,240 TOTAL TREATMENTS



FOCUS AREAS

CLINICAL SERVICES

Bali Peduli operates two clinics, namely the Paul Latourell Centre in Denpasar and Klinik Anggrek at Puskesmas Ubud II, where HIV/STI testing and treatment are provided. The Paul Latourell Center primarily serves residents in the Seminyak, Kuta, and Denpasar areas, while Klinik Anggrek caters to the Gianyar Regency. Clinical services are offered free of charge for Indonesian nationals. In recent years, we have introduced a pay-for-service option for international patients, who are requested to contribute a reasonable fee for the services. This approach helps cover operational expenses and aligns with Bali Peduli's sustainability efforts. More importantly this allows us to provide free services for Indonesian individuals.

Our clinics are designed to provide a comprehensive and convenient experience, offering sampling, testing, treatment, and counselling in one location. This model ensures easy accessibility for diverse clients. Since its establishment, 84,118 patient visits have occurred in Bali Peduli's clinics, with 20,566 individuals enrolled in our programs. We have conducted over 24,201 HIV tests and administered antiretroviral (ARV) treatment to 1,442 patients. Additionally, we continue to provide testing and treatment for syphilis and other sexually transmitted infections (STIs).

Until mid-2023, Bali Peduli provide clinical services at two locations in Bali: The Paul Latourell Centre in Denpasar and Klinik Anggrek in Ubud, Gianyar. In order to enhance sustainability and ongoing development, as well as to better serve the affected communities, we have relocated the clinic at The Paul Latourell Centre to a new, strategically better area that is more accessible to communities. The new clinic is located in Imam Bonjol Square on Jl Sunset Rd, Denpasar.

SUPPORT FOR PEOPLE LIVING WITH HIV

Support for individuals living with HIV extends beyond the administration of antiretroviral (ARV) treatment. We understand the importance of addressing the emotional and mental well-being of our clients alongside their medical needs.

To enhance accessibility and convenience, we have implemented a hotline and telehealth services. These platforms enable clients to easily connect with our counsellors and arrange their appointments in a timely manner. We recognize the significance of ensuring that all clients can receive the necessary information pre & post clinic visit.

We strive to provide holistic care by addressing the various aspects of living with HIV. Our support services encompass medication management, counselling, and the use of technology to enhance accessibility, ultimately promoting the overall well-being of our clients.

FOCUS AREAS

EDUCATION

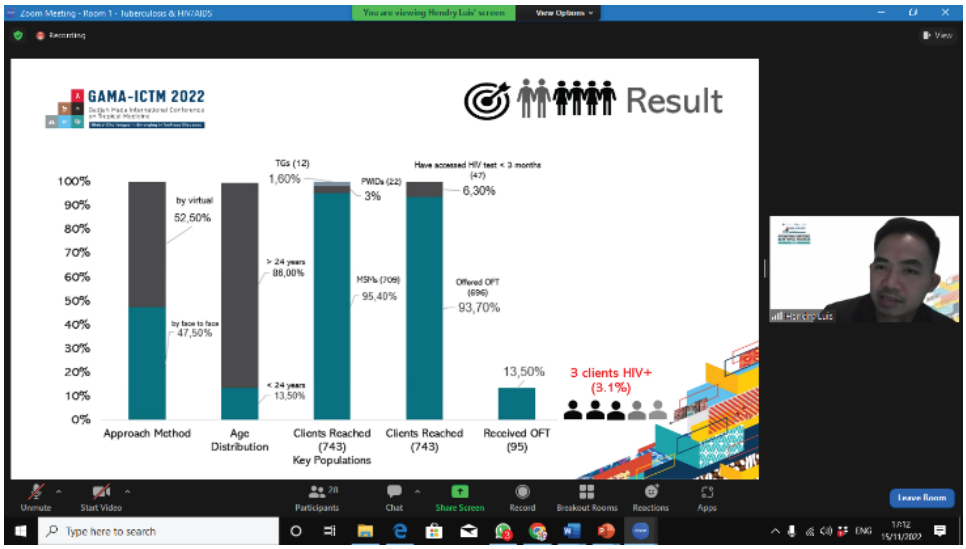
Promoting education about sexual health is a crucial aspect of preventing and managing the spread of HIV. Bali Peduli empower young individuals, enabling them to take control of their sexual health and make well-informed decisions. HIV related health literacy also play a vital role in supporting people living with HIV (PLWH) in effectively managing their condition and leading healthy and fulfilling lives.

We are committed to a zero-discrimination strategy, firmly believing that everyone, regardless of their gender, sexual orientation, economic status, or any other factors, should have equal access to essential health information and client-focused services. Bali Peduli actively promotes HIV prevention through various means, including face-to-face sessions, online programs through telehealth, and webinars. These diverse approaches allow us to reach a wider community, ensuring that our education initiatives have a broad impact and reach individuals who may benefit from this knowledge.

RESEARCH AND SCIENTIFIC STUDIES

Bali Peduli actively collaborates with various partners to conduct research projects focused on HIV. We have been involved in several significant research initiatives, including the UTAMA Project, Bali PRIA Study, and Medical Record Review, in collaboration with renowned institutions in the HIV and public health sectors worldwide. Research and scientific studies hold great importance for us as they help identify existing gaps within the community. Through research, we can present data-driven advocacy to address these gaps effectively. In 2022, we continued our research with the Bali PRIA (Pilot Cohort for HIV/AIDS) study, which aims to explore HIV and STI prevention strategies among men who have sex with men (MSM) and trans women in Bali. These studies are conducted in collaboration with the Center for Public Health Innovation, Faculty of Medicine, Udayana University, and the Kirby Institute, a prestigious medical research institution affiliated with the University of New South Wales (UNSW) Australia.

Furthermore, we have had the opportunity to share our work related to HIV at various international scientific conferences. These include the Asia-Pacific AIDS & Co-Infections Conference (APACC), Gadjah Mada International Conference on Tropical Medicine 2022 (GAMA-ICTN 2022), The 3rd World Conference on Public Health 2022, and The 4th International Conference on Public Health & Wellbeing 2022. We seized these opportunities to expand our network and stay updated on HIV- related issues. The knowledge and information we gather through these conferences are utilized to benefit the clients in our services, ensuring that we deliver the most effective and up-to-date care.



ACTIVITIES IN 2022

Discussion on HIV Viral Load cartridges

A discussion took place between the Ubud II Public Health Center/Klinik Anggrek, Bumi Sehat Foundation, and the Gianyar Health Office regarding the utilization of the HIV Viral Load cartridge support. The purpose of this discussion was to address the gap in achieving viral load suppression among individuals who have been undergoing antiretroviral treatment. The discussion explored the potential of using the HIV Viral Load cartridge as a tool for monitoring viral load levels in people living with HIV. Viral load suppression is a critical aspect of HIV treatment, as it indicates the effectiveness of antiretroviral therapy in suppressing the replication of the virus in the body. By closely monitoring viral load levels, healthcare providers can ensure that individuals on treatment are achieving and maintaining optimal viral suppression.

This collaborative effort demonstrates a commitment to improve the quality of HIV care and ensuring that those living with HIV can achieve optimal health outcomes.

"Recover Together" Program

Bali Peduli has joined as a volunteering supporter of the Maha Bhoga Marga Foundation's "Recover Together" program. This collaborative effort aims to tackle the challenges and consequences arising from the COVID-19 pandemic, with a specific focus on priority populations, including individuals living with HIV (PLWH).

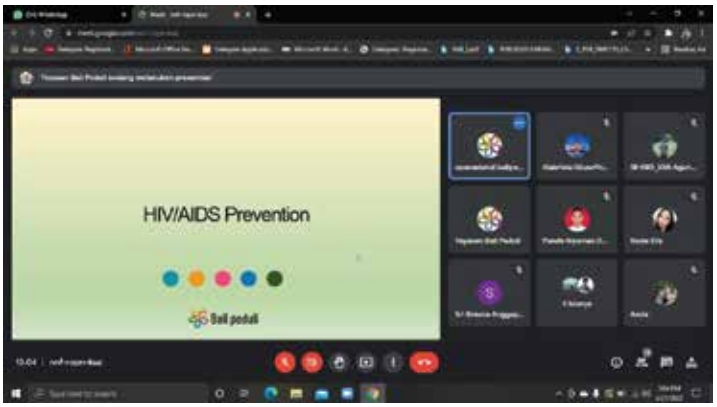
Through this partnership, Bali Peduli and the Maha Bhoga Marga Foundation work together to address the unique needs and concerns of PLWH during the ongoing pandemic. This may involve providing essential support services, access to healthcare, counselling, and other resources to ensure the well-being and resilience of PLWH in these challenging times.

The "Recover Together" program highlights the importance of a collective effort in addressing the impacts of the COVID-19 pandemic and reinforces the commitment of both organizations to support and uplift vulnerable populations, particularly those living with HIV. By combining their expertise and resources, Bali Peduli and the Maha Bhoga Marga Foundation strive to mitigate the effects of the pandemic and ensure the continued care and support for PLWH in the community.

ACTIVITIES IN 2022 continued

Online presentation for Udayana University

Bali Peduli conducted an online presentation on HIV prevention for students from Udayana University who were engaged in the community service program (KKN) in Jimbaran Village, Badung. The presentation aimed to educate and raise awareness about HIV prevention strategies among the university students. As a next step, these students will further disseminate the information they obtained to high school students in the Jimbaran sub-district area.



Tanya Marlo Festival

Bali Peduli actively participated in the "Tanya Marlo Festival," an event aimed at raising awareness about HIV among young people. Supported by UNAIDS Indonesia and Inti Muda Indonesia, the festival provided a platform for engaging discussions and activities related to HIV prevention and Sexual & Reproductive Health Rights (SRHR). As part of the festival, a dialogue competition called "IM Talks" was organized to encourage young key populations to express their rights and opinions regarding SRHR. This competition served as a forum for young individuals to voice their perspectives and advocate for the importance of comprehensive sexual health education, HIV prevention, and the rights of marginalized communities.

Mini workshop on PrEP

Bali Peduli Executive Director Dr. Hendry Luis participated as a facilitator in a mini workshop on PrEP during the GWL INA (Gaya Warna Lentera Indonesia) community network event. The purpose of the workshop was to provide a knowledge refresher on Pre-Exposure Prophylaxis (PrEP) as an emerging HIV prevention strategy in Indonesia, specifically targeting high-risk communities. The workshop, held within the GWL INA community network event, aimed to directly engage high-risk communities and ensure they have access to accurate and up-to-date information about PrEP. The workshop provided a valuable platform for participants to learn about the benefits and usage of PrEP, ultimately promoting safer practices and reducing the incidence of new HIV infections within these communities.

ACTIVITIES IN 2022 continued

Facilitating a national webinar

Dr. Hendry also took on the role of a facilitator in a national webinar organized through a collaboration between United Nations Fund for Population Activities (UNFPA), Indonesia AIDS Coalition (IAC) and the Ministry of Health of Indonesia. The webinar focused on the expansion of HIV testing coverage through community-based HIV screening.

Community-based HIV screening is an innovative approach aimed at addressing psychosocial barriers that hinder individuals from accessing HIV testing services. This model seeks to improve accessibility and convenience by bringing HIV screening services directly to communities. The goal is to identify individuals with positive HIV screening results and subsequently refer them to nearby healthcare facilities for further diagnostic testing and linkage to appropriate treatment and care services.

Presentation for the Marriott Associate Team

Our dr. Mikhael San Putra Wijanarko and Ns. Gusti Ngurah Agus Arimbawa, S.Kep. were invited to deliver a presentation and participate in a talk show at a hybrid sharing session organized for the Marriott Associate Indonesia team. The purpose of the session was to raise awareness about HIV and its prevention among the participants. The presentation and talk show provided valuable education and insights on HIV, addressing common misconceptions and highlighting the importance of prevention. The enthusiastic participation of the attendees demonstrated their interest in understanding HIV and seeking clarification on related topics.

Following the educational session, voluntary HIV testing was offered as a proactive step towards ensuring personal health and wellbeing. This initiative provided an opportunity for individuals to take a proactive approach towards their sexual health and contributed to reducing stigma surrounding HIV testing.

Tripartite coordination on viral load testing

Bali Peduli Foundation, Bumi Sehat Foundation, and Puskesmas Ubud II/Klinik Anggrek held a tripartite coordination meeting to discuss a collaboration aimed at providing viral load testing. The meeting focused on establishing a coordinated approach to deliver viral load testing services to individuals who have been successfully following their prescribed antiretroviral treatment regimens.

ACTIVITIES IN 2022 continued

Key Population Mapping Meeting

Ns. Pande Made Darmawan, S.Kep., our nurse, participated in a Key Population Mapping meeting where he provided an overview of the HIV epidemic among at-risk population groups. The purpose of the meeting was to gather comprehensive information and data about key populations affected by HIV. The information shared during the meeting will serve as a foundation for planning targeted HIV program interventions that address the specific needs and challenges faced by these key populations.

INTERACT study

Dr. Hendry actively contributed to a meeting that reviewed the protocol, and discussed strategic issues, for the "Indonesia Intervention Study to Test & Treat people with Acute HIV infection" (INTERACT). This study aims to optimize HIV care delivery and strengthen the HIV care cascade by implementing same-day diagnosis and treatment pathways for individuals with acute HIV infection (AHI). The meeting revolved around essential topics such as recruitment procedures, diagnostic testing protocols, treatment initiation strategies, and data collection and analysis.

Key population mapping

Once again, nurse Ns. Pande Made Darmawan, S.Kep., took on the role of a resource person at a stakeholder coordination meeting focused on mapping and estimating key populations in the Gianyar area. The meeting aimed to gather relevant stakeholders and discuss strategies for identifying the locations, sizes, and behaviors of key populations affected by HIV.

Mapping key populations plays a crucial role in understanding the specific needs and vulnerabilities of these communities. By recognizing and acknowledging their unique characteristics, we can develop targeted interventions and healthcare services that address their specific challenges and reduce health disparities. Mapping efforts enable us to promote inclusivity, equality, and equitable access to healthcare services for key populations affected by HIV.

ACTIVITIES IN 2022 continued

Visit from the Global Development Group

The Global Development Group (GDG) Team conducted a monitoring and evaluation visit to discuss the progress and future direction of the HIV Prevention & Treatment program at Bali Peduli. This visit aimed to assess the program's performance, review its achievements, and provide recommendations for its future development.

During the visit, the GDG Team engaged in discussions with the Bali Peduli team to gain insights into the program's implementation, challenges faced, and outcomes achieved thus far.

The GDG Team's monitoring and evaluation visit is essential in ensuring program accountability, identifying areas of improvement, and aligning future plans with the program's goals. By receiving valuable feedback and recommendations from the GDG Team, Bali Peduli can further enhance its HIV prevention and treatment program, optimizing its impact and addressing the evolving needs of the communities it serves.

GDG supports Bali Peduli by facilitating tax deductible donations from Australia, the USA, the UK, and New Zealand.

Networking event with GDG

Bali Peduli attended a networking evening alongside the GDG team and other GDG partners in Bali. This event offered an opportunity for organizations with similar goals to come together in a social and friendly setting. The primary purpose of the evening was to foster connections and facilitate networking among like-minded organizations in Bali.

During the event, Bali Peduli had the chance to engage in meaningful conversations, share experiences, and establish connections with other GDG partners. This networking session created a supportive environment where organizations could learn from one another, exchange ideas, and explore potential collaborations.

ACTIVITIES IN 2022 continued

Online webinar on mapping Gianyar Regency

Bali Peduli attended the online dissemination event focused on sharing the mapping results and estimation of key populations in Gianyar Regency. The purpose of this event was to provide stakeholders, community members, and organizations involved in HIV prevention and care with access to the findings and data gathered during the mapping process.

Global Fund for Aids, Tuberculosis and Malaria semesterly meeting

Bali Peduli participated in a semesterly cascade meeting and data validation session supported by the Global Fund (GF) for AIDS, Tuberculosis, and Malaria (ATM) in Gianyar Regency. The purpose of this meeting was to review and validate the data collected from all Voluntary Counselling and Testing (VCT) HIV services operating in the Gianyar area.

Through the cascade meeting and data validation session, Bali Peduli and other stakeholders in Gianyar Regency had the opportunity to assess the effectiveness of VCT HIV services, identify areas for improvement, and strengthen the coordination of efforts. These collaborative efforts contribute to evidence-based decision-making and the development of targeted interventions to enhance HIV prevention, testing, and treatment services in the Gianyar area.

ACTIVITIES IN 2022 continued

Seminar on tourism and STIs

Bali Peduli took an active part in a seminar aimed at gaining new insights from experts and researchers regarding the current state of the wellness and tourism industry, future trends, challenges, and innovative approaches in the context of HIV and STIs. This seminar provided an invaluable opportunity for Bali Peduli to expand its knowledge and understanding of the intersection between sexual health, wellness, responsible tourism practices, and the prevention of HIV and STIs.

The insights gained from the seminar will enhance Bali Peduli's ability to deliver effective interventions, develop appropriate policies, and implement innovative strategies to prevent and manage HIV and STIs in the context of the wellness and tourism industry.

Talks at regional public health centers

Ns. Gusti Ngurah Agus Arimbawa, S.Kep., our operations manager, took on the role of delivering talks on HIV and STIs to health cadres in Blahbatuh, Tampaksiring, Sukawati, Ubud, and Gianyar Public Health Centers. These talks aimed to empower the cadres by equipping them with knowledge and skills to support people living with HIV (PLWH) who are undergoing HIV treatment.

Additionally, the cadres were expected to reach out to more communities to encourage HIV testing and to reconnect PLWH who have discontinued their medication/treatment to the necessary services. This empowerment initiative was crucial in strengthening the capacity of the cadres and enabling them to play an active role in the prevention and management of HIV and STIs within their respective communities.

ACTIVITIES IN 2022 continued

Doctors Without Stigma collaboration

Bali Peduli collaborates with the community "Doctors Without Stigma" (@doktertanpastigma) to provide education on HIV prevention and treatment to young people with disabilities. This collaborative effort aims to ensure that this vulnerable population receives the necessary information and support to protect themselves from HIV transmission and access appropriate treatment and care.

By partnering with "Doctors Without Stigma", Bali Peduli combines their expertise and resources to deliver targeted education and awareness programs specifically designed for young people with disabilities. These programs address the unique challenges and needs of this population, ensuring that they are well-informed about HIV prevention methods, testing options, and available treatment options.

This collaboration not only contributes to the empowerment and well-being of young people with disabilities but also aims to reduce stigma and discrimination surrounding HIV.

Presentation at national meeting of Indonesian HIV Research Network

Bali Peduli was privileged to present a brief review on HIV and COVID-19 regulations and policies at the national meeting of the Indonesian HIV Research Network. In our presentation, we emphasized the importance of considering human rights and law enforcement, as well as recognizing the intersectionality between HIV and COVID-19, in order to effectively work towards ending AIDS by 2030.

By highlighting the intersectionality of HIV and COVID-19, Bali Peduli underscored the need to address the unique challenges posed by both pandemics. We emphasized the significance of safeguarding human rights in HIV and COVID-19 responses, ensuring that policies and regulations protect the dignity and well-being of individuals living with HIV.

Furthermore, our presentation emphasized the importance of collaboration and a comprehensive approach that takes into account the diverse needs and circumstances of affected communities. We highlighted the necessity of integrating HIV and COVID-19 prevention, testing, treatment, and care services to achieve optimal outcomes and effectively respond to both pandemics.

Through our participation in the national meeting of the Indonesian HIV Research Network, Bali Peduli actively contributed to the advancement of knowledge, policy discussions, and collaborative efforts aimed at ending AIDS by 2030.

ACTIVITIES IN 2022 continued

"Giving Back to Bali" event

Bali Peduli also participated in the "Giving Back to Bali" event, which focused on empowering the community to live their healthiest lives. As part of their contribution to the event, Bali Peduli provided a comprehensive health check-up that included screenings for HIV, blood glucose, uric acid, and cholesterol levels.

The objective of offering these health check-ups was to promote early detection, prevention, and management of health conditions that can significantly impact individuals' overall well-being. Bali Peduli's provision of HIV testing aligns with our commitment to raising awareness about HIV and ensuring access to testing and treatment services for the community.

World AIDS Day 2022 with Diponegoro University

Bali Peduli collaborated with Diponegoro University to commemorate World AIDS Day 2022. Together, they organized a webinar aimed at raising awareness and promoting young people's involvement in HIV prevention efforts. Through this webinar, Bali Peduli delivered a presentation to educate young individuals about HIV prevention strategies and encourage their active participation in combating the HIV epidemic.

The webinar provided a platform for engaging with a wide audience, particularly young people, who play a crucial role in shaping the future of HIV prevention and advocacy. By delivering a presentation, Bali Peduli aimed to increase awareness, dispel myths and misconceptions surrounding HIV, and promote evidence-based prevention methods among the youth.

Through this collaboration with Diponegoro University, Bali Peduli demonstrated its commitment to engage with educational institutions and empowering young people in the fight against HIV.

Presentation at the International Conference on Tropical Medicine

Dr. Hendry had the opportunity to present the work and experience of Bali Peduli through a virtual oral paper presentation at the International Conference on Tropical Medicine held at Gadjah Mada University. The presentation focused on the implementation of Bali Peduli's project on saliva HIV self-testing for key populations.

Through the virtual presentation, Dr. Hendry shared valuable insights and findings from Bali Peduli's project, highlighting the significance and effectiveness of saliva HIV self-testing in reaching key populations. The presentation aimed to showcase the organization's work and the positive impact it has had on HIV testing rates among key populations.

ACTIVITIES IN 2022 continued

Presentation at the World Conference on Public Health

Bali Peduli had the honor of being selected as one of the presenters at the 3rd World Conference on Public Health 2022. Alongside colleagues from various countries, Bali Peduli is an active contributor to stimulating creative innovations aimed at addressing public health challenges.

Presentation at the International Conference on Public Health and Well-being

Bali Peduli had the opportunity to present a brief paper review on the human rights approach to maintaining all lines of the HIV cascade care during the COVID-19 pandemic at the 4th International Conference on Public Health and Well-being 2022.

In the presentation, Bali Peduli highlighted the importance of upholding human rights in the context of HIV care and the challenges faced during the COVID-19 pandemic. The paper review emphasized the need to ensure that all aspects of the HIV cascade, including prevention, testing, treatment, and support services, continue to be accessible and provided without discrimination during times of crisis.

Participation in concept note drafting workshop

Ni Made Betti Ratricia Surya Dewi,S.KM., our project manager, had the opportunity to attend a concept note drafting workshop organized by the Indonesian Non-Government Organization Council. The workshop aimed to accelerate lobbying and advocacy efforts for the social contract for HIV/AIDS prevention in Denpasar City.

Through her participation, Betti gained valuable insights and skills in drafting a concept note, a crucial document used in advocacy and lobbying activities. The workshop provided her with a deeper understanding of the social contract for HIV/AIDS prevention and equipped her with the tools to effectively communicate and advocate for its implementation in Denpasar City.

ACTIVITIES IN 2022 continued

Participation in an International AIDS Society workshop

Dr. Hendry had the privilege of attending and participating in a workshop that brought together regional and national experts and researchers in the field of HIV. The workshop was supported by the IAS (International AIDS Society) through the Educational Fund Workshop. The primary objective of the workshop was to expedite the development of HIV prevention, testing, and treatment strategies in Indonesia by leveraging scientific advancements and promoting community involvement.

The workshop served as a platform to discuss and share key findings from the AIDS 2022 conferences, which provided valuable insights and research outcomes in the field of HIV. By highlighting these findings, the workshop aimed to foster collaboration, knowledge exchange, and innovation among participants.

Sharing experience with Bumi Sehat Foundation

Bali Peduli was privileged to share its valuable experience with the team at Bumi Sehat Foundation, focusing on our expertise in delivering excellent HIV and STI testing services. We discussed the importance of providing friendly and inclusive services, ensuring rigorous quality assurance measures, and fostering innovation in our approach. Emphasizing the significance of a non-discriminatory environment, we highlighted the value of compassionate support, strict confidentiality, and building trust with clients. Additionally, we shared our best practices in quality assurance, including standardized testing protocols, regular training for healthcare professionals, and robust monitoring and evaluation processes. By exchanging these insights, we aimed to inspire and collaborate with the Bumi Sehat Foundation team, working together to enhance their HIV and STI testing services and make a lasting impact in HIV & sexual health care in Gianyar Regency.

ACTIVITIES IN 2022 continued

Facility tour for 2nd Nursing Healthcare Symposium in Bali

Bali Peduli hosted a facility tour for participants of the 2nd Nursing Healthcare Symposium in Bali. During the tour, we highlighted our exceptional one-stop services and our commitment to providing non-stigmatizing care in HIV and sexual health for young vulnerable individuals and communities. Participants were enthusiastic about experiencing our services firsthand and gaining insights into our approach.

We showcased our comprehensive range of services, including testing, treatment, counselling, and education. The facility tour provided an opportunity for meaningful exchanges, fostering collaboration and raising awareness about the importance of holistic care in addressing HIV and sexual health challenges.

Participation in medical dispute resolution workshop

Our project manager, Ni Made Betti Ratricia Surya Dewi,S.KM., had the valuable opportunity to participate in a workshop focused on enhancing knowledge and skills related to medical dispute resolution. Through this mini workshop, we gained new insights into effective communication skills, negotiation tactics, and mediation techniques. These learnings are instrumental in helping us prevent conflicts and minimize legal risks, ultimately ensuring the protection of both our patients and us as healthcare providers.

Organization of capacity building session for all staff

With the support from Psychology Faculty of Udayana University, Bali Peduli organized a capacity building session for all staff, led by senior clinical psychologist I Gusti Ayu Diah Fridari, S.Psi., M.Psi.,Ph.D from the Faculty of Psychology, School of Medicine, Udayana University. During the session, Dr. Fridari delivered a talk on Psycho-Spiritual Integrative Therapy and its relevance in promoting the well-being and mental health of both staff and patients. The session provided valuable insights into the connection between psychological and spiritual aspects of therapy, highlighting their combined role in enhancing overall well-being. Dr. Fridari shared knowledge and techniques that can be applied to support the mental health of staff members, emphasizing the importance of self-care and maintaining a healthy work-life balance. The session also emphasized how incorporating spiritual practices can positively impact mental health outcomes for both staff and patients.

ACTIVITIES IN 2022 continued

Team-building day

With the kind support of Villa Beji Indah and Bali Peduli's Founder, Dr. Steve Wignall, a full team gathering of Bali Peduli staff was organized. The main objective of this activity was to strengthen bonds and foster teamwork among the staff members, with the aim of improving communication, enhancing collaboration, and maintaining a positive organizational culture.
The gathering provided a valuable opportunity for the entire Bali Peduli team to come together in a relaxed and informal setting. Through team-building exercises, group discussions, and engaging activities, staff members were able to deepen their connections, build trust.

Year-end dinner for staff

Bali Peduli hosted a year-end dinner to express appreciation for the outstanding work of all staff members and to foster a renewed spirit for the upcoming year. The event aimed to celebrate achievements, acknowledge the dedication and commitment of the team, and inspire everyone to continue their efforts in the fight against HIV.

The year-end dinner provided an opportunity for staff members to come together in a joyous and festive atmosphere. It served as a platform to express gratitude for the hard work and contributions made by each individual throughout the year.

OUR NEW CENTER

Our new center in Imam Bonjol Square.
We are still continuing to enhance our services to serve our valued clients and partners, also ensuring improved efficiency and accessibility.
